reactive systems: modelling, specification and verification - reactive systems: modelling, specification and verification luca aceto*† anna ingolfsd´ottir´ *† kim g. larsen* jiri srba* october 19, 2005

modelling, specification and verification of reactive systems - organization of the course introduction formal models for reactive systems modelling, specification and verification of reactive systems introduction to the course **modelling timed reactive systems from natural-language ...** - under consideration for publication in formal aspects of computing modelling timed reactive systems from natural-language requirements gustavo carvalho1, ana cavalcanti2 and augusto sampaio1

modelling, specification and verification of reactive systems - introduction to ccs syntax of ccs semantics of ccs value passing ccs modelling, specification and verification of reactive systems milner's calculus of communicating systems (ccs) **guidelines for modelling reactive systems with coloured ...** - guidelines for modelling reactive systems with coloured petri nets madalenagon, calvesandjo~aom.fernandes centroalgoritmi—universidadedominho **part i a classic theory of reactive systems 1 introduction** - describe non-trivial reactive systems and their specifications using the aforementioned models and verify the correctness of a model of a system with respect to given specifications either manually or by using automatic verification tools **testing of reactive systems - citeseerx** - testing of reactive systems —course notes— henrik bohnenkamp summer semester 2007 1 modelling reactive systems the basic ingredients to model reactive systems: **modelling and simulation framework for reactive transport ...** - reactive transport modelling is a valuable tool in understanding the fate and transport of contaminants in bed-sediments. developed and mature models have been used for the analysis of datasets, from bench-scale laboratory setups to field-scale demonstrations, to interpret complex interactions between processes occurring in the subsurface systems (e.g., boudreau, meysman, & middelburg 2004 ... **specification and verification of reactive systems with rlds** - specification and verification of reactive systems with rlds kalliopi androutsopoulos submitted to the university of london for the degree of doctor of philosophy june 2004 king's college of london department of computing abstract formal methods have been applied to reactive systems in order to capture errors early on in the development life-cycle and reduce redesign costs. the reactive ... **specification and animation of reactive systems** - perhaps the best known work on formal modelling of reactive systems is that embodied in the statemate tool [5]. the visual formalism of statecharts allows compact, hierarchical descriptions based on a finitestate machine model. the graphical model itself can be directly executed. animation and formal analysis are possible with solve, but less directly than in the case of statecharts. solve ... **model-based testing of reactive systems - researchgate** - model-based testing of reactive systems andres kull . tallinn university of technology faculty of information technology department of computer control dissertation was accepted for the defence of ... **model-based experimental analysis of kinetic phenomena in ...** - phenomena in multi-phase reactive systems w. marquardt lehrstuhl für prozesstechnik, rwth aachen university, aachen, germany this contribution will introduce a novel concept for mechanistic modelling of complex kinetic phenomena and will explore its potential for multi-phase reaction systems modelling. the approach aims at the integration of high resolution measurements, modelling on ... **modelling real-time systems: issues and challenges** - systems are often installed in places (such as satellites) where the weight, volume or power consumption must be limited, or where temperature, humidity, pressure and other factors cannot be as carefully controlled as in the traditional machine room.
